Profile

Web Developer with experience designing responsive, user-centered interfaces focused on UX principles. Skilled in building modern web applications using React, Next.js, Vercel, and working with component libraries such as Material UI, Radix UI, and Lucide. Experienced in integrating REST APIs and delivering scalable, maintainable solutions.

I bring a unique background as an Industrial Engineer with 2 years of experience as a bilingual Logistics Coordinator and 2 years as a bilingual Customer Service Agent, combining technical skills with strong problem-solving, communication, and operational efficiency expertise.

Currently advancing my career path toward becoming a Full Stack Software Engineer.

Work Experience

Web Developer | Freelance | Projects

April 2025 - Present

- Developed a responsive web catalog for a local perfume shop in Barranquilla, improving product visibility and user experience.
- Contributed to brand growth by designing and implementing strategic, user-centered responsive interfaces using React (Components & Hooks), Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Git, and Node.js.

- **Projects:**

1. **DailyFlow:** A personal productivity web app that combines visual weekly planning with financial tracking. I allows you to organize your time by category, track, and analyze your monthly income.
2. **ImpostorGame:** Mobile Game inspired by the viral TikTok game called “The Impostor”, where players have to find the impostor among them. This game is deployed on the Expo Go app and is ready to use. The code is open source, so people can contribute.
3. **BuscaPelis:** This is a website where people can find information for more than 1 million movies and 200k TV series. TMDB API powers this.
4. **Online Catalog:** This is a web catalog for a local perfume shop in Barranquilla, created with HTML and CSS.
